EDUCATION

MES Wadia College of Engineering
BE, Computer Engineering | Current CGPA: 8.465

Pune, India
Dec 2021 – Present

EXPERIENCE

Machine Learning Intern

Jan. 2024 – Apr. 2024

M.E.S. Wadia College of Engineering, Pune

- Developed a Handwritten Words Recognition system using TensorFlow, achieving 95% accuracy on the "I AM Word" Handwriting Dataset
- Architected an advanced CNN-LSTM model that integrated CTC loss functions, resulting in 1M+ handwritten text samples processed efficiently, greatly improving transcription turnaround time for the customer service department
- Utilized data augmentation techniques to enhance model generalization, resulting in a 20% improvement in recognition of diverse handwriting styles
- Engineered a high-performance data ingestion pipeline using TensorFlow's Dataset API, resulting in a 30% reduction in end-to-end training time and improved GPU utilization
- Engineered a user-friendly interface for real-time handwriting recognition, enhancing accessibility for 500+ users and enabling practical applications in educational tools, thereby increasing user engagement by 30% within three months

PROJECTS

Test Report Automation System with Security Controls | *Final Year Project (Sponsored)*

- Developing a .NET web application to automate test report generation with features for data input and report management
- Implementing user management and database integration for streamlined testing processes and improved efficiency
- Implemented a Role-Based Access Management for the users keeping the segregated functionalities according to user's roles

Handwritten Recognition System | *Python, TensorFlow, CNN-LSTM*

- Developed a handwriting recognition model with TensorFlow, achieving 10% CER on IAM Word dataset
- Optimized CNN-LSTM architecture with CTC loss, improving accuracy by 15%
- Reduced data preprocessing time by 40% using parallelized DataProvider class
- Applied adaptive learning rate scheduling, cutting training time by 20%
- Compressed model by 98% via quantization and ONNX for efficient deployment

ACHIEVEMENTS

GATE Marks: 48.74

GATE Ranks: 4793

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, HTML, CSS, LaTeX

Development Tools: VS Code, Git/GitHub

Cloud Platforms: Google Cloud Platform

Database Systems: SQL, NoSQL, MongoDB

OS: Linux, Windows

COURSES & CERTIFICATION

Coursera

- **Google Cybersecurity Professional Certificate** | *Verify*
- **HTML, CSS, and Javascript for Web Developers by Johns Hopkins University** – HTML5 – CSS – JavaScript
